

TRANSITION TO REMOTE AREA NURSING

WHO SHOULD ATTEND

Registered nurses new to remote health, considering a career move to remote area nurses or interested in remote / rural contracts.

ABOUT THIS COURSE

This 10 day face-to-face short course prepares registered nurses with the skills and knowledge required to become effective members of remote primary health care teams.

Modules include:

- Framing Indigenous Health
- Remote Advanced Nursing Practice
- Remote Trauma Skills
- Pharmacotherapeutics for Remote Area Nurses

With a focus on cultural safety, hands on skills acquisition and relevant learning, the 10 days provide ideal preparation for remote area nursing.

The Framing Indigenous Health module, with a focus on cultural safety, the social determinants of health and primary health care, provides the participant with a learning experience that will enhance their knowledge and skills specifically relating to the geographical, environmental and cultural context of remote health service delivery.

The Remote Advanced Nursing Practice module concentrates on the development of foundational skills and knowledge for advanced and extended nursing practice and includes: the RAN model of consultation, clinical reasoning, assessment and management, investigation including pathology, communication and collaborative practice, evidence based practice, advanced clinical skills.

The Remote Trauma Skills module provides the theory and practical skills required for Triage, Plastering and Suturing in the remote setting.

Taken separately as an online course, Pharmacotherapeutics for Remote Area Nurses aims to assist participants in developing the necessary knowledge and skills to ensure medications are used appropriately, effectively, judiciously and safely within an individual's legislated scope of practice in the remote context.

**“CLINICAL SKILLS, ASSESSMENT SKILLS,
PHONE CONSULTATION SKILLS”**

“FEELING MORE CONFIDENT”
